This Annual Report is brought to you for free and open access by the College of Health & Wellness at ScholarsArchive@JWU. It has been accepted for inclusion in Health & Wellness Department Faculty Publications and Research by an authorized administrator of ScholarsArchive@JWU. For more information, please contact jcastel@jwu.edu.
INTRODUCTION

The purpose of this report is to identify and present documentation on substance use (i.e., alcohol, tobacco, and other drugs) and mental health indicators for both adults and youth in the communities of Rhode Island as compared to the State. In particular, we focus on demographics, prevalence indicators, risk and protective factors, and consequences.

The report is designed to be used as a resource by various RI state agencies, such as the Department of Behavioral Healthcare, Developmental Disabilities and Hospitals (BHDDH); the State Epidemiological Outcomes Workgroup (SEOW); and the many community-based Substance Abuse Prevention Task Forces in RI.

It is important to note that this is a working document. The Rhode Island Community Profiles 2016 is understood to be an evolving document, to be improved and updated regularly both with additional indicators and years of data, when available.

ACKNOWLEDGEMENTS

Thank you to SEOW membership and BHDDH staff. Funding for this report comes from the Substance Abuse and Mental Health Services Administration Award number U579SP020159.

The Brown University Team

- Stephen Buka, ScD
- Samantha Rosenthal, PhD, MPH
- Anna Cimini, MA

Department of Behavioral Healthcare, Developmental Disabilities and Hospitals

- Rebecca Boss, MA, Interim Director
- Elizabeth Kretchman, CPSS, Associate Administrator, Program Services and Community Engagement Unit
- Linda Barovier, CPSS, Associate Administrator, Policy and Planning
- Candace Rodgers, MPH, CHES, SPF-PFS Project Director
- Daniel Fitzgerald, Rhode Island Prevention Coordinator

NOTE: For the purposes of this report “New Shoreham” and “Block Island” are synonymous and “Block Island” will be referenced throughout.

Consequences – Substance Abuse Admissions

### Substance Abuse Admissions by Age Group, Fiscal Years 2012-2014

- **%18-21**
- **%22-30**
- **%31-45**
- **%46-65**
- **%OVER 65**

**NOTE:** Admissions may not be unique individuals; patients could have presented for treatment multiple times. Admissions under 18, with unknown municipality, out of state, or with unknown age were excluded.

### Substance Abuse Admissions by Race/Ethnicity, Fiscal Years 2012-2014

- **White**
- **Black**
- **Hispanic**
- **Other**

**NOTE:** Admissions may not be unique individuals; patients could have presented for treatment multiple times. Admissions with unknown municipality, out of state, or with unknown race/ethnicity were excluded.

### Substance Abuse Admissions by Primary Substance, Fiscal Years 2012-2014

- **Alcohol**
- **Heroin/Other Opiates**
- **Marijuana**
- **Cocaine/Other/Unknown**

**NOTE:** Admissions may not be unique individuals; patients could have presented for treatment multiple times. Admissions with unknown municipality or out of state were excluded.

**SOURCE:** Behavioral Health On-Line Database (BHDDH)
CONSEQUENCES – MENTAL HEALTH ADMISSIONS

NOTE: Mental Health admissions may be for mental health treatment or co-morbid mental health and substance abuse treatment. Admissions may not be unique individuals; patients could have presented for treatment multiple times.

NOTE: Mental Health admissions may be for mental health treatment or co-morbid mental health and substance abuse treatment. Admissions may not be unique individuals; patients could have presented for treatment multiple times. Admissions with unknown race/ethnicity were excluded.

NOTE: Mental Health admissions may be for mental health treatment or co-morbid mental health and substance abuse treatment. Admissions may not be unique individuals; patients could have presented for treatment multiple times. Anxiety (ICD-9-CM: 300.00-02, 300.21-23, 300.29-30, 308.30, 309.21, 309.81) Major Depression (ICD-9-CM: 296.2-296.3) Other Mood Disorder (ICD-9-CM: 296.0, 296.4-296.89, 296.9, 300.4, 301.13, 311) Schizophrenia (ICD-9-CM: 295) Other (Adjustment Disorder 309.00, 309.24, 309.28, 309.30, 309.40; Attention Deficit Disorder 314; Conduct Disorder 312.80, 312.90, 313.81; Dementia 290, 293-294; Autism 299, 315; Other Psychotic Disorder 297-298; Personality Disorder 312.30-39; No diagnosis or Unknown)
Consequences – Suicidality

**Considered Suicide PAST 12 MONTHS**

- Highest Value: 12.2
- RI Average: 9.6
- Lowest Value: 8.0

**Attempted Suicide PAST 12 MONTHS**

- Highest Value: 5.8
- RI Average: 3.2
- Lowest Value: 2.2

**2013-2014 Middle School Prevalence**

- Considered Suicide PAST 12 MONTHS: Barrington 4.3, Rhode Island 10.6
- Attempted Suicide PAST 12 MONTHS: Barrington 0.9, Rhode Island 4.5

**NOTE:** Highest/lowest indicates the highest/lowest value across all communities in a given school year; Highest/Lowest community may vary by school year.
