La Guardia Airport

DESIGNED FOR THE AVIATION OF TOMORROW

A monument to the untiring efforts of Mayor Fiorello H. LaGuardia of New York and his associates, this great air terminal is unsurpassed by any other in the world. A few facts of interest to the visitor...

It cost about $40,000,000 to build and equip; at peak of construction over 23,000 men were employed.

Covers 558 acres of ground, of which 357 acres were created by filling in the waters of Flushing Bay and Long Island Sound.

The revolving signal beacon on top of the control tower is the nation’s most powerful — thirteen and a half million candlepower.

Each of its seven land-plane hangars is larger than Madison Square Garden; the seaplane hangar is big enough to hold two football fields.

The concrete "apron" in front of the Observation Deck is 1½ miles long and 400 feet wide. It can accommodate 21 big transport planes loading and unloading at the same time.

Two of the four "wind-rose pattern" runways are over a mile long and 200 feet wide. At night they are illuminated by special runway-lamps operated by the control towers.

There are about 250 scheduled arrivals and departures of transport planes daily; planes come and go all day long and far into the night.
